GLOBAL BEAUTY CARE SOLUTION

DERMAKOR

MISSION

We continue to research, develop and design new products in the medical device and aesthetic industries.

VISION

To help aestheticians around the world create, maintain and emphasize the beauty and personality of everyone.

Customer Promise

Honest and faithful partnership.
Safety and effective products at affordable prices.

DERMAKOR

COSMETICS AND MEDICAL COMPANY

GREETINGS FROM CEO

I would like to express my deep gratitude to our customers for their trust and love in DERMAKOR.

We started the aesthetic field in 2010 and founded DERMAKOR in 2018. In response to the needs of existing customers, the company will continue to expand its business to include aesthetic and specialized medical devices.

We are creating a portfolio of "total aesthetic solutions" to maximize synergy. DERMAKOR continues to make endless efforts to develop new value-added BEAUTY CARE products through continuous R&D investment. DERMAKOR further strengthen our partnership based on the superior quality of products and customer confidence to develop into a "Global Beauty Care Company".

We are looking forward to your continued interest and support.
Thank you.

Kind regards, Soo Yong KIM
CEO of DERMAKOR

Sterile Absorbable Hyaluronic Acid Dermal Filler

MIXO

LIGHT | VOLUME | DEEP

LIGHT PLUS | VOLUME PLUS | DEEP PLUS (with lidocaine 3mg/ml)

Hyaluronic Acid Dermal Filler | 20mg/ml, 1.0ml

MI means Beauty from Korean Hanja and XO is from eXtraOrdinary.

MIXO is premium monophasic hyaluronic acid filler for beautiful and unique people who want to emphasize their natural beauty and individuality.

What is Hyaluronic Acid(HA) Filler?

Safety, biodegradable and biocompatible material.

HA has a much greater capacity to retain water than any other natural or synthetic polymer.

Hydrates, regenerates skin, improves elastin and collagen production.

Reduces the appearance of fine wrinkles and returns lost contours of the face.

Can be removed easily and perfectly.

Performance

Hyaluronic acid is a high molecular substance composed of repeated disaccharides of N-acetyl glucosamin and glucuronic acid. Ajoure has realized a stable gel through precision cross-linking technology. The stable stucture of hyaluronic acid gel fills the space, supports the structure, protects the cell, replenishes the volume of wrinkled skin and keeps it natural.

Safety

The active ingredient used in Ajoure is non-animal. It is a human-adapted component, contains high-purity hyaluronic acid and naturally decomposed over time. Hyaluronic acid cross-linking gel can be corrected through hyaluronidase when a problem occurs. It is safe by providing the level of endotoxin and crosslinking agent below the detection limit through strict manufacturing process management.

Usability

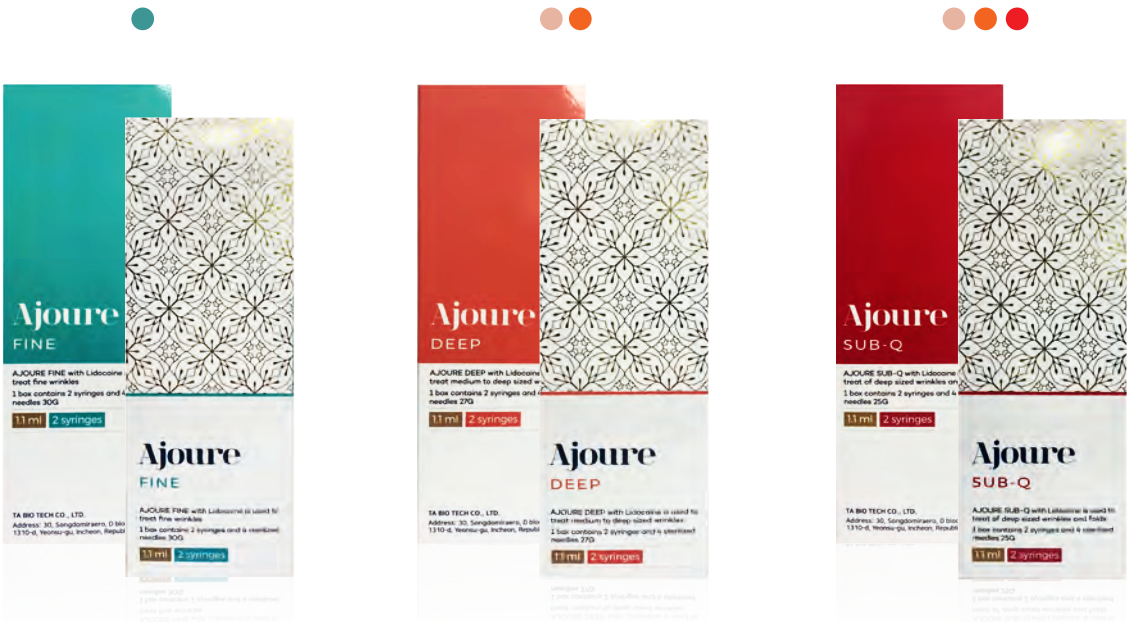

Precisely designed handles and push rods keep the pressure at the time of injection evenly, enabling stable treatment. The monophasic structure is a regular and stable gel structure, and it is a specialized technology applied to Ajoure that realizes natural volume and soft injection feeling.

Pain relief

Ajoure contains Lidocaine to improve pain-related discomfort during the treatment.

Ajoure

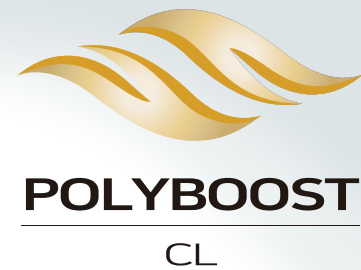

FINE | DEEP | SUB-Q

Product Name	FINE	DEEP	SUB-Q
Injection Site	Superficial to mid dermis	Mid to deep dermis	Mid to deep dermis subcutaneous layer
HA Concentration	24 mg / ml		
Visco-elasticity	Low	Mid	High
Duration	6 - 9 months	9 - 18 months	12 - 24 months
Packaging unit	30G*2	27G*2	25G*2
Injection Area	All facial wrinkles, lip augmentation	Nasolabial folds, forehead, marionette lines and face lifting	Facial contouring, chin and chick augmentation
Syringe Volume	1.1ml * 2syr		
Lidocaine	0.3%		
Shelf Life	24 months		
Storage	Store in 2 - 25°C. Protect from direct sunlight and freezing		

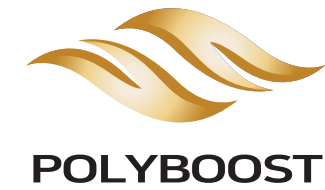

* The durations are depends on age, lifestyle and the skill of a practitioner

Combination product consisting of a polycaprolactone (PCL) power

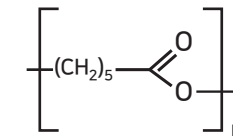

POLYBOOST CL FILLER

PCL 120mg 2.5ml x 1 syringe

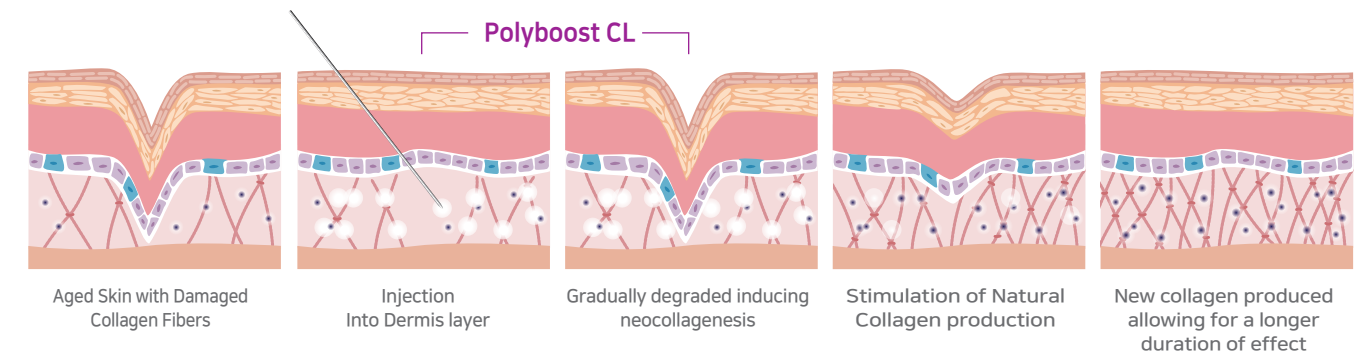

POLYBOOST CL

Liquid PCL 120mg/mL. Equivalent to 90 pcs of monothreads.

- Collagen and elastin production
- Biodegradable medical substance, excreted to water and CO₂
- Non-allergic
- Safe, approved by FDA and CE

Effect

Features

- Stimulated tissues regenerate sub-materials such as elastin, collagen, and amino-peptides, and eventually form new tissue.
- Solubilized **PCL** constitutes the fixed 3D Matrix formation in the dermal layer of the skin with fine volume.
- Continuously promotes tissue proliferation in the skin during the year.
- Fully biodegrades from the human body up to 18 months.

Ingredients

- Liquid Polycaprolactone (nano-scale particles 50-60 micron) – 120 mg
- Non Cross-Linked Hyaluronic Acid – 20mg

Mixture : Polyboost CL 2.5cc + 2% Lidocaine 0.4cc

Mix between 2 syringes using mixing tube

No. of treatments

3 times, 1 procedure/month
Additional 1~2 procedures depending on patient's condition with 4~6 months interval

Dose

- Face – 2.5-5ml
- Neck – 1.5-3ml
- Body – 2.5-10ml

Injection Technique

- Multi Injection, 0.02cc per point
- Fanning technique

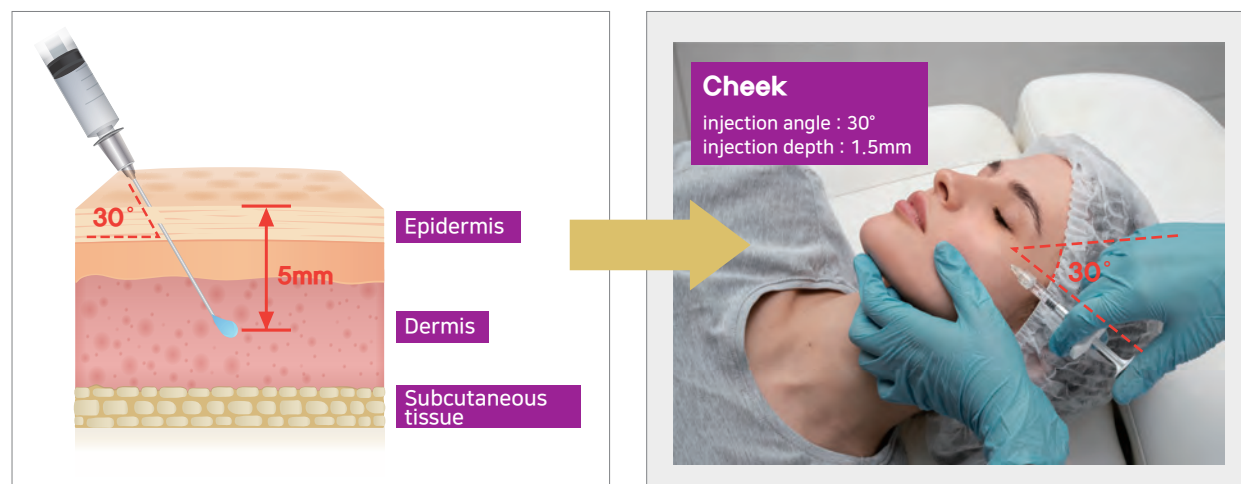

Application

- Deep Dermis 1.5mm
- 32G4~34G4 mesoneedle
- 23G~27G Filler cannula

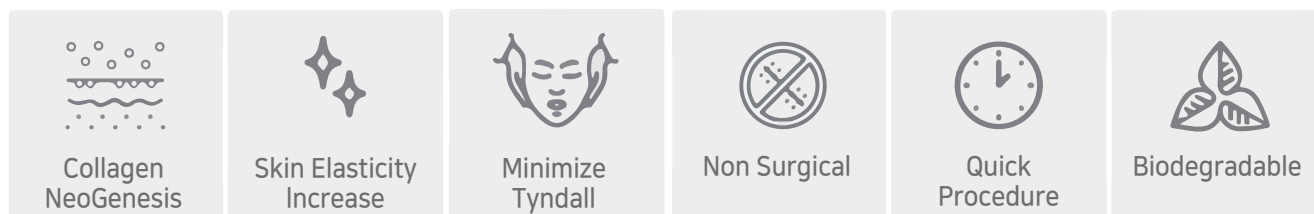

POLYBOOST CL treatment photo

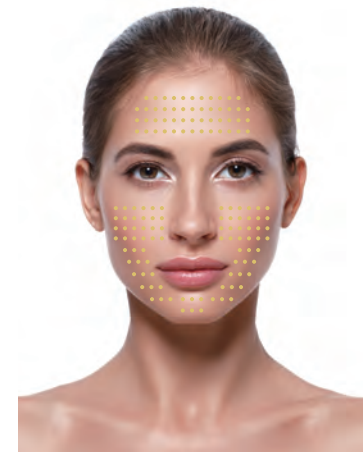

Treatment method

Advantages

POLYBOOST CL Injection zones

Indication	Whole face
Depth	Upper-dermis
Solution	Polyboost CL 2.5cc +2% lidocaine 0.4cc
Method	Papular, 0.02cc – 0.03cc per injection point

Indication	Crow's lines
Depth	Upper-dermis
Solution	Polyboost CL 0.5cc +2% lidocaine 0.1cc
Method	Papular, 0.02cc – 0.03cc per injection point

Indication	Whole face anti-aging
	1. Frown lines 2. Under eye 3. Cheek 4. Nasolabial folds 5. Marionette lines
Depth	Upper, mid dermis
Solution	Polyboost CL 5cc +2% lidocaine 0.5cc +normal saline 7.5cc
Method	Fanning technique with 25G cannula

body LINE SOLUTION

Daarin

S10 | H10

Micro Beads of Cross-Linked Hyaluronic Acid

Body Filler daarin H10 10cc (10 ml)
Body Filler daarin S10 10cc (10 ml)

Description

Description

Gain a sexy body with the new item DAARIN Body Filler, made of purified cross-linked hyaluronic acid in a 10mL pre-filled syringe.
It is the perfect solution for the natural-looking body profile you've always dreamed of.

We offer top-quality DAARIN FILL Body Filler at a very friendly price.

The body filler consists of 100% cross-linked non-animal hyaluronic acid, created using the precision cross-linking technology, thanks to which it has an instant and visible result, increases the duration of the effect and makes the procedure safe and completely eliminated from the body.
In addition, DAARIN promotes quick recovery and leaves minimal marks after the procedure.
It is best used for shaping the breasts, giving symmetry to the buttocks, and giving volume to skin irregularities.

Application area

Application area

Filler specially designed for volumetric soft tissue replenishment and body contouring

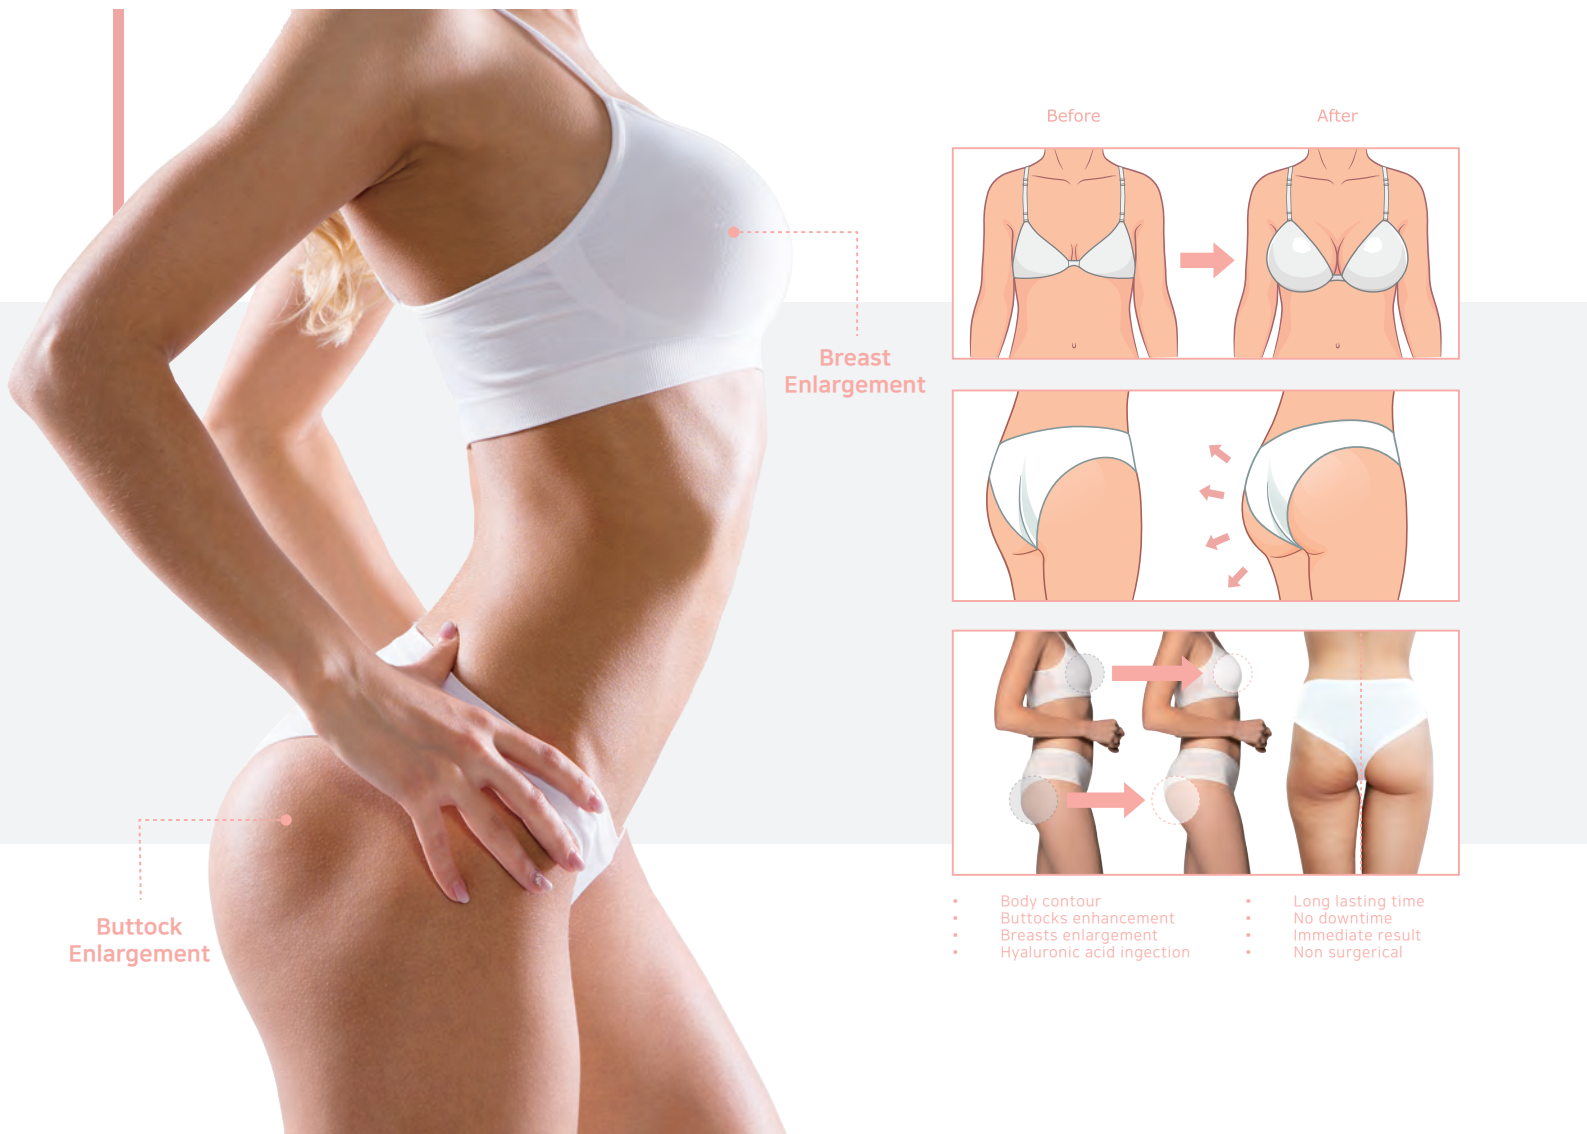

- Correction of the shape and volume of the breast;
- Replenishment of volume and correction of asymmetry of the buttocks;
- Correction of the asymmetry of the legs;
- Replenishment and alignment of soft tissues after volumetric liposuction;
- Elimination of irregularities on the surface of the skin caused, for example, by liposuction.
- Intimate areas

DAARIN Body Filler Benefits

DAARIN Body Filler Benefits

- It provides quick and long-term effects
- It is an ideal alternative to surgical interventions
- It can avoid complications such as scarring
- It is made of purified, stabilized hyaluronic acid obtained by a patented biotechnological method.
- It does not require anesthesia as the procedure is virtually painless
- It contains anti-aging properties that can naturally radiate youthfulness to the skin.

DAARIN Body Filler Benefits

- CE.ISO.MSDS OK
- Long durability OK
- No animal ingredients OK
- Natural Looking OK
- No skin test needed OK
- Biodegradable, non permanent OK

Point recommended usage

DAARIN Body Filler Efficiency

A single application of **DAARIN** Body Filler provides an effect lasting 12-15 months, and with delicate care up to 2 years. The gel, which is biologically compatible with the human body, gradually dissolves in the process of metabolism. To ensure the effect for a longer period and to maintain the aesthetic result, it is possible to repeat the procedure.

How long until the results appear?

The skin's volume appears restored almost immediately, with optimal results a day or two after the treatment.

FORMULATION

DAARIN BODY FILLER – 10mg/mL HA
Each mL consists of 10mg of concentrated and purified hyaluronic acid. The gel is devoid of any animal toxins that may cause allergic reactions because it was processed through the innovative HENM cross-linking biotechnology method.

PACKAGING

PACKAGING AND SPECIFICATIONS

1 syringe × 10 ml per pack ---
protocol: Subcutaneous and intradermal injection
Needle size: 30G
Shelf-life: The product must not be used past its expiration date.
Please check the package for reference.
Storage: Stored at room temperature (2°C-25°C) and kept away from direct sunlight and freezing

Country Of Origin: Republic Of Korea

FILLICIA

FILLICIA 200,1000 | FILLICIA SIGMA 200

Smart SPDS™
It is an actual microsphere produced by T.A Bio Tech Co., Ltd.

Proprietary technology that can mass - produce microspheres of uniform size from nano to micro.

	High Precision <ul style="list-style-type: none">• Production of perfect spherical microparticles• Produce desired uniform particles
	Solid Strength <ul style="list-style-type: none">• Stable spherical shape during processing• Stable and constant biodegradation in the body
	Control the Duration <ul style="list-style-type: none">• Control duration by polymer type & property• Expandable with uniform size
	Excellent Safety <ul style="list-style-type: none">• Dissolving thread ingredients that have been used for a long time• Complete loss of absorption in body after tissue regeneration

What is Microsphere?

- Small spherical fine particle. It is a key ingredient of 4th generation filler as collagen stimulator in body.
- In the case of HA fillers have a simple filling effect, but powder fillers induce skin tissue regeneration to remove wrinkles naturally.

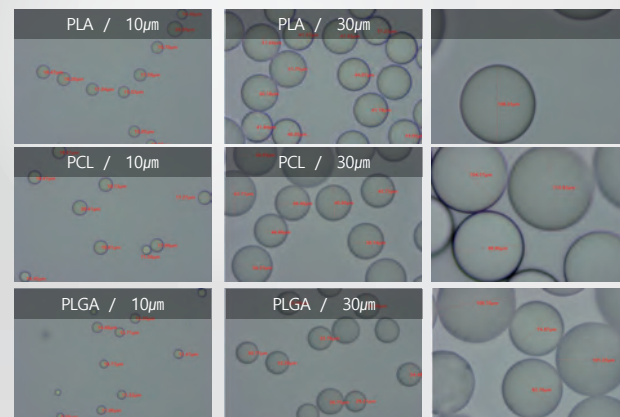

What is a biodegradable substance?

- Hydrolyzed in body and used as major ingredient in cosmetics, tissue engineering device and depot formula.
- There are various types as PLLA, PDO and PCL used for a long time and they have various physical properties depending on composition and molecule size.

Produce high-quality microspheres	Control of degradation period in body	Wide range of possibilities
Unique platform technology that can mass - produce spherical particles of uniform size	Production of microspheres with different degradation periods in body through precise control	Widely applicable to pharmaceuticals, medical devices and cosmetics

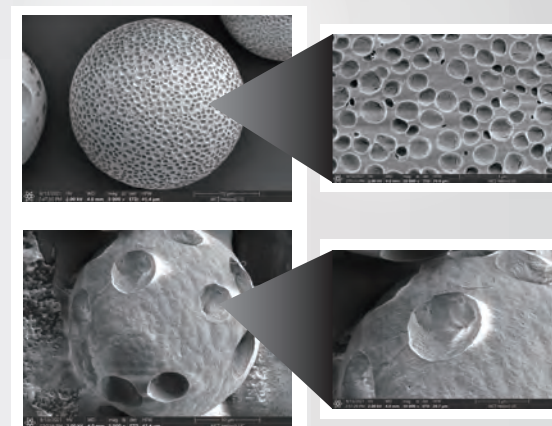

Spherical Microparticles

- Particle size can be freely adjusted according processing size of the membrane
- Uniform production with various materials such as PLA, PCL, and PLGA

Porous microparticles

- Production of fine particles with many pores on the surface
- Faster collagen stimulation and biodegradation

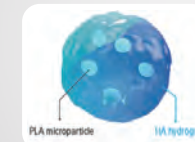

FILLICIA

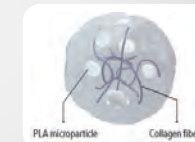

FILLICIA 200,1000 | FILLICIA SIGMA 200

Effect

Continuously promotes tissue proliferation in the skin during the year.
Effective in treatment of scars, stretch marks (striae), keloid scars.

Improving skin turgor, removes fine wrinkles, moisturizes, return lost volumes, long lasting lifting effect, scars removal, pores tightening.

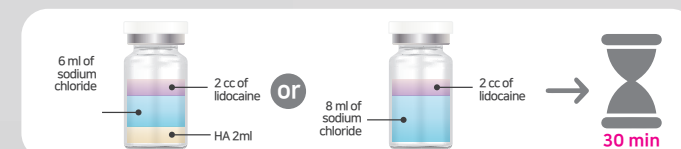

Stimulated tissues regenerate sub-materials such as elastin, collagen, and amino-peptides, and eventually form new tissue.

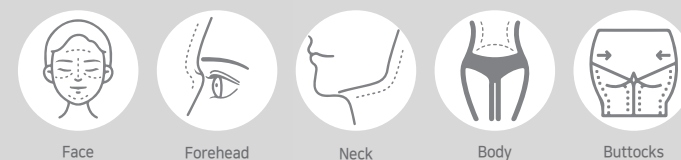

Some volume loss occurs during 1-2 weeks after injection. The production of cell and collagen restores lost volume at week 3-4 after injection.

Ingredients

Mixture: Non cross-linked HA 2ml + Sodium Chloride (Sterile Water) 6ml + Lidocaine 2cc
Or Sodium Chloride (Sterile Water) 8ml + Lidocaine 2cc. Dilution time over 30min.

Possible correction areas

Features

- Easily injectable, Biocompatible.
- Fully biodegrades from human body up to 24months.
- Spherical shapes 50-60 micron in size.
- Should be mixed with liquid diluent before the procedure.

No. of treatments

3 times, 1 procedure/month

Dose

- 1 to 5 vials per procedure.
- Face, forehead, nasolabial folds, marionette lines, cheeks – 2.5-5ml
- Neck and decolette– 1.5-3ml
- Body 2.5-10ml

Injection Technique

- Fanning technique

Shelf period after opening

- Must be used immediately after dilution.
- **No re-use.**

Application

- Cannula 23-25G, SubQ

Long-lasting effect

- Up to 24 months

MOISTURIZING IN ALL FORMS

Sappire AQUA DROP

SAPPIRE AQUA DROP

STERILE ABSORBABLE MOISTURIZING GEL

2.5ml X 3

What is Sodium Hyaluronate?

Sodium Hyaluronate is a natural substance. It is present in the body wherever moisture is stored or lubrication between layers of tissue is required to eliminate friction. It is also used to relief pain due to osteoarthritis of the knees.

Improves signs of aging	Plumps	Repairs damaged moisture barrier
<p>Sodium hyaluronate works to replace lost moisture.</p> <p>This added moisture smooth skin structure by removing fine lines and Wrinkles.</p>	<p>Sodium hyaluronate provides structure and volume creates instantaneous plumpness in the skin.</p>	<p>Sodium hyaluronate is essential for restoring and maintaining. A healthy barrier to prevent transepidermal water loss.</p>

Sappire AQUA DROP is an effective and powerful mesotherapy solution.

- Replenishment of hyaluronic acid deficiency in the skin
- Restoration of skin elasticity
- Prevention of small wrinkles (decollete, eyes, neck)
- Improving overall skin condition

Single dose of Sappire AQUA DROP is enough to get healthy and radiant looking skin. Like hyaluronic acid, sodium hyaluronate is incredibly hydrating, but this texture helps to penetrate deeper into skin.

Sappire AQUA DROP	
Ingredient	1 syringe contains 20mg of Sodium Hyaluronate
Product capacity	2.5ml prefilled syringe
Shelf-life	24 months from manufacturing date
Storage Method	Store at room temperature(2°~25°C), avoid light and freezing
Supplied Package	3 prefilled syringes (2.5ml) / pack

Injection Guidelines

Sappire AQUA DROP is injected to a depth of 1.5 mm into the surface layers of the epidermis. Administration shall be done using a thin gauge needle (30G~32G ½"). Course of Application : 5-7 procedures with an interval of 7-10 days.

SKIN BOOSTER

Sappire
PDRN

Skin Booster Sappire PDRN

With Salmon DNA for Skin Regeneration.
5ml x 5vials

SAPPIRE PDRN

The enriched formula is indicated for the prevention and control of signs of aging, regeneration, improvement of the structure and quality of the skin.
Smoothing tone and improves skin elasticity.

- The level of **PDRN** favorably perceived by the body
- Noticeable effect after the 2nd procedure
- Comfortable procedure
- Ease of Use
- Large Volume

ACTIVE INGREDIENTS

Water(Aqua), Sodium Hyaluronate, Glutathione,
DNA(Salmon 1.5%), Acetyl Hexapeptide-8,
Palmitoyl Pentapeptide-4

Mesotherapy

Sappire PDRN 2,5ml
+
Saline 3 ml

PROTOCOL

Popular injections (micro papulas) of 0.01-0.02ml
subcutaneously to a depth of 1.5-2 mm,
an interval of 1.5cm.
30G4 or 32G4 needle at an angle of 10-15 degrees;
an injector - at a right angle.

COURSE OF APPLICATION

3-5 procedures with an interval of 10-14 days

FAT DISSOLVER

SAPPIRE SLIM

Premium Slimming Solution

Sappire Slim Premium PPC Solution

Sappire SLIM Effect of the 4 mixing technologies

10ml x 5 vials

SAPPIRE SLIM

By blocking substances that are transmitted to the nerves to relieve pain.

It regenerates the elasticity of the skin that wrinkles when the fat layer falls off.

- No pain at the injection site
- Rapid effect of lipolysis (Fast effects)
- Prevents wrinkles and aging caused by the inclusion of hexapeptide ingredients

ACTIVE INGREDIENTS

Water, Sodium Deoxycholate, Phosphatidylcholine, Carnitine, Acetyl Hexapeptide-8, Palmitoyl Pentapeptide-4, Palmitoyl Tetrapeptide-7

PROTOCOL

1 point recommended usage
Abdomen/waist (thicker fat layer) : 0.15ml ~ 0.3ml or less
Thighs or hip : 0.1ml ~ 0.15ml or less
Armpit (thinner fat layer) : 0.05 ~ 0.1ml or less
In case of abdomen/waist, 0.15~0.3cc on a spot into the fat layer and move to next half an inch or a centimeter distant.

COURSE OF APPLICATION

Repeat this treatment 2~3 times(Once every 15 days) | 10ml x 5

SKIN MESOTHERAPY

SAPPIRE S-TOX

Complex of Growth
Factors and Vitamins

16 Cell Growth Factors & Antioxidant vitamins

Sapphire S-TOX skin booster with 16 Cell Growth Factors & Antioxidant vitamins

5ml x 5 vials | 10ml x 2 vials

SAPPIRE S-TOX

Sapphire S-TOX contains 16 ingredients necessary for cell growth factor and promotion of collagen and elastin, reducing wrinkles and maintaining elasticity

- Promoting Collagen
- Elastin Regeneration
- Removes Active oxygen
- Prevents skin aging
- Anti-pigmentation and whitening
- Antibacterial and moisturizing components

ACTIVE INGREDIENTS

Water, EGF, FGF, IGF, Acetyl Hexapeptide-8, Nicotinoyl Tripeptide-1, Naturotics Plus, MultiEx BSASM Plus, Vitamin C, B2, B3, B12, Adenosine, L-Carnitine, Palmitoyl Pentapeptide-4, Palmitoyl Tetrapeptide-7, Hydroxyethylcellulose, Dipeptide diaminobutyroyl benzylamide, Arginine, Arbutin, 1,2-Hexanediol

PROTOCOL

Do not use more than 0.2 cc of Sapphire S-Tox ampoule at every (one) point.
The needle depth must be adjusted according to the skin thickness and applicable site. Diagonal 0.2 to less than 1mm.

HAIR LINE SOLUTION

Hair Rich

Sapphire Hair Line Solution

Scalp Recovery & 11 Hair Growth Factors

Cleans the scalp and supplies cell growth factors and nutrients.

Promotes hair growth by improving the scalp environment.

Removes active oxygen and prevents scalp skin aging through antioxidant vitamins.

Soothes and moisturizes the scalp and acts as an antibacterial and pore cleaning.

WORLD'S FIRST HA+PDO MESOTHREAD

HARMONY

Sterile Single Use Polydioxanone suture coated with non cross-linked HA

Disposable Medical Device Non pyrogenic Heavy metal free

Harmony HA+PDO

The New Harmony of PDO Thread & Non-Crosslinked Hyaluronic Acid

INCREASE of Tensile Strength : more than 30%

INCREASE of Duration : 3 times, Up to 18 months.

The thread is a scaffold that promotes fibroblast activity. Help to trigger collagen neogenesis in a soft tissue.

Focus of HA Lift is giving efficacy of HA therapy by simple thread implantation.

Unlike liquid type injection, the Harmony thread can be easily implanted in a correct depth with accurate amount.

Hyaluronic acid(HA)

Used as an ingredient in skin care products due to its "unique capacity in retaining water."

HA is therefore a key skin care ingredient when it comes to reinforcing our skin's health, as well as giving it a plump, youthful texture and preventing cutaneous aging.

PDO : most safety and certified material. Helps rejuvenate and promote skin's tightening.
